2.01 2.00\*\*\* Revision Date Issuing date 15-Dec-2022 15-Dec-2022

# SECTION 1: Identification of the substance / mixture and of the company / undertaking

### 1.1. Product identifier

Identification of the substance/preparation

## Propionaldehyde

 CAS-No
 123-38-6

 EC No.
 204-623-0

 Registration number (REACh)
 01-2119456625-33

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Transported isolated intermediate (1907/2006)
Uses advised against	None

#### 1.3. Details of the supplier of the safety data sheet

Company/Undertaking Identification	<b>OQ Chemicals GmbH</b> Rheinpromenade 4A D-40789 Monheim Germany
Product Information	Product Stewardship FAX: +49 (0)208 693 2053 email: sc.psq@oq.com

#### 1.4. Emergency telephone number

Emergency telephone number	+44 (0) 1235 239 670 (UK) available 24/7
National emergency telephone number	National Poisons Information Centre +353 (0)1 809 2166
	available to the public 8 am - 10 pm +353 (0)1 809 2566 available 24/7 for medical professionals

### **SECTION 2: Hazards identification**

#### 2.1. Classification of the substance or mixture

#### This substance is classified based on Directive 1272/2008/EC and its amendments (CLP Regulation)

Flammable liquid Category 2, H225 Acute oral toxicity Category 4, H302 Acute inhalation toxicity Category 4, H332 Skin corrosion/irritation Category 2, H315 Serious eye damage/eye irritation Category 2, H319 Target Organ Systemic Toxicant - Single exposure Category 3, H335

In addition to the CLP classification based on OQ data this product should also be regarded as:

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

#### Propionaldehyde 10640

Version / Revision

2.01

Serious eye damage/eye irritation: category 1

#### **Additional information**

For full text of Hazard- and EU Hazard-statements see SECTION 16.

#### 2.2. Label elements

Labelling according to Regulation 1272/2008/EC and its amendments (CLP Regulation).

#### Hazard pictograms

Signal word	Danger
Hazard statements	H225: Highly flammable liquid and vapour. H302: Harmful if swallowed. H332: Harmful if inhaled. H315: Causes skin irritation. H319: Causes serious eye irritation. H335: May cause respiratory irritation.
Precautionary statements	<ul> <li>P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P233: Keep container tightly closed.</li> <li>P261: Avoid breathing gas/mist/vapours.</li> <li>P280: Wear protective gloves/protective clothing/eye protection/face protection.</li> <li>P301 + P330: IF SWALLOWED: Rinse mouth</li> <li>P303 + P361 + P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.</li> <li>P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.</li> <li>P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P312: Call a POISON CENTRE/doctor if you feel unwell.</li> <li>P403 + P235: Store in a well ventilated place. Keep cool.</li> </ul>

#### 2.3. Other hazards

PBT and vPvB assessment

Vapours may form explosive mixture with air Vapour is heavier than air and can travel considerable distance to a source of ignition and flashback Components of the product may be absorbed into the body by inhalation and ingestion

Endocrine disrupting	The substance is not listed on the candidate list according to Art. 59(1), REACh.
assessments	The substance was not assessed as having endocrine disrupting properties according to regulation 2017/2100/EU or 2018/605/EU.

### **SECTION 3: Composition / information on ingredients**

Not required

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

### Propionaldehyde

10640

Version / Revision

2.01

#### 3.1. Substances

Component	CAS-No	REACh-No	1272/2008/EC	Concentration (%)
Propionaldehyde	123-38-6	01-2119456625-33	Flam. Liq. 2; H225	> 98,5
			Acute Tox. 4; H302	
			Acute Tox. 4; H332	
			Skin Irrit. 2; H315	
			Eye Irrit. 2; H319	
			STOT SE 3; H335	
			ATE = 1690 mg/kg	
			(oral)	
			ATE = 10,1 mg/L***	
			(inhalation)	
			(vapours)	

For full text of Hazard- and EU Hazard-statements see SECTION 16.

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

#### Inhalation

Keep at rest. Aerate with fresh air. When symptoms persist or in all cases of doubt seek medical advice.

#### Skin

Wash off immediately with soap and plenty of water. When symptoms persist or in all cases of doubt seek medical advice.

#### Eves

Rinse immediately with plenty of water, also under the evelids, for at least 15 minutes. Remove contact lenses. Obtain medical attention.

#### Ingestion

Do not induce vomiting without medical advice. Call a physician immediately.

#### 4.2. Most important symptoms and effects, both acute and delayed

#### Main symptoms

shortness of breath, cough, central nervous system depression, hypertensive effect, narcosis, headache, nausea, vomiting, unconsciousness.

#### Special hazard

Lung oedema, Lung irritation, Kidney disorders, Liver disorders.

#### 4.3. Indication of any immediate medical attention and special treatment needed

#### **General advice**

Remove contaminated, soaked clothing immediately and dispose of safely. First aider needs to protect himself.

Treat symptomatically. In case of lung irritation, first treatment with cortisone spray.

### SECTION 5: Firefighting measures

### 5.1. Extinguishing media

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

## Propionaldehyde 10640

Version / Revision 2.01

#### Suitable extinguishing media

alcohol-resistant foam, dry chemical, carbon dioxide (CO2), water spray

#### **Unsuitable Extinguishing Media**

Do not use a solid water stream as it may scatter and spread fire.

#### 5.2. Special hazards arising from the substance or mixture

Under conditions giving incomplete combustion, hazardous gases produced may consist of: carbon monoxide (CO) carbon dioxide (CO2) Combustion gases of organic materials must in principle be graded as inhalation poisons Vapour is heavier than air and can travel considerable distance to a source of ignition and flashback

Vapours may form explosive mixture with air

#### **5.3. Advice for firefighters**

#### Special protective equipment for firefighters

Fire fighter protection should include a self-contained breathing apparatus (NIOSH-approved or EN 133) and full fire-fighting turn out gear.

#### Precautions for firefighting

Cool containers / tanks with water spray. Dike and collect water used to fight fire. Keep people away from and upwind of fire.

### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: For personal protective equipment see section 8. Avoid contact with skin and eyes. Avoid breathing vapors or mists. Keep people away from and upwind of spill/leak. Ensure adequate ventilation, especially in confined areas. Keep away from heat and sources of ignition. For emergency responders: Personal protection see section 8.

#### 6.2. Environmental precautions

Prevent further leakage or spillage. Do not discharge product into the aquatic environment without pretreatment (biological treatment plant).

#### 6.3. Methods and material for containment and cleaning up

#### Methods for containment

Stop the flow of material, if possible without risk. Dike spilled material, where this is possible.

#### Methods for cleaning up

Soak up with inert absorbent material. DO NOT use combustible materials such as sawdust. Keep in suitable, closed containers for disposal. If liquid has been spilt in large quantities clean up promptly by scoop or vacuum. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours).

#### 6.4. Reference to other sections

For personal protective equipment see section 8.

### SECTION 7: Handling and storage

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

### Propionaldehyde

10640

Version / Revision 2.01

#### 7.1. Precautions for safe handling

#### Advice on safe handling

Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product. Provide sufficient air exchange and/or exhaust in work rooms. Refill and handle product only in closed system. Do not use compressed air for filling, discharging or handling.

#### **Hygiene measures**

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.

#### Advice on the protection of the environment

See Section 8: Environmental exposure controls.

#### Incompatible products

acids and bases amines oxidizing agents

#### 7.2. Conditions for safe storage, including any incompatibilities

#### Advice on protection against fire and explosion

Keep away from sources of ignition - No smoking. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). In case of fire, emergency cooling with water spray should be available. Ground and bond containers when transferring material. Vapour is heavier than air and can travel considerable distance to a source of ignition and flashback. Vapours may form explosive mixture with air. The pressure in sealed containers can increase under the influence of heat.

#### **Technical measures/Storage conditions**

Keep containers tightly closed in a cool, well-ventilated place. Handle and open container with care. Handle under nitrogen, protect from moisture. Keep at temperatures between 9 and 38 °C (48 and 100 °F).

#### **Temperature class**

Τ4

#### 7.3. Specific end use(s)

Transported isolated intermediate (1907/2006)

### SECTION 8: Exposure controls / personal protection

#### 8.1. Control parameters

#### **Exposure limits European Union**

No exposure limits established

#### Exposure limits Ireland

#### Ireland OELs

Component	TWA (mg/m³)	TWA (ppm)	STEL (mg/m³)	STEL (ppm)	Skin Absorption	Sensitizer
Propionaldehyde CAS: 123-38-6		20				

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

2.01

#### Propionaldehyde 10640

\_\_\_\_\_

DNEL & PNEC

Propionaldehyde, CAS: 123-38-6 Workers

DN(M)EL - long-term exposure - systemic effects - Inhalation DN(M)EL - long-term exposure - local effects - Inhalation

**Environment** 

PNEC aqua - freshwater PNEC aqua - marine water PNEC aqua - intermittent releases PNEC STP PNEC sediment - freshwater PNEC sediment - marine water PNEC Air PNEC soil Secondary poisoning

#### 8.2. Exposure controls

**Special adaptations (REACh)** Not applicable.

#### **Appropriate Engineering controls**

General or dilution ventilation is frequently insufficient as the sole means of controlling employee exposure. Local ventilation is usually preferred. Explosion-proof equipment (for example fans, switches, and grounded ducts) should be used in mechanical ventilation systems.

#### Personal protective equipment

#### General industrial hygiene practice

Avoid contact with skin, eyes and clothing. Do not breathe vapours or spray mist. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Hygiene measures

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.

#### Eye protection

Tightly fitting safety goggles. In addition to goggles, wear a face shield if there is a reasonable chance for splash to the face.

Equipment should conform to EN 166

#### Hand protection

Wear protective gloves. Recommendations are listed below. Other protective material may be used, depending on the situation, if adequate degradation and permeation data is available. If other chemicals are used in conjunction with this chemical, material selection should be based on protection for all chemicals present.

Suitable material	butyl-rubber
Evaluation	according to EN 374: level 5
Glove thickness	approx 0,3 mm

6,1 mg/m³

Version / Revision

12,1 mg/m<sup>3</sup>

0,014 mg/l 0,0014 mg/l 0,14 mg/l 12,4 mg/l 0,0307 mg/kg 0,00307 mg/kg No hazard identified 0,00263 mg/kg No potential for bioaccumulation

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

#### Propionaldehyde 10640

Version / Revision 2.01

Break through time	approx 240 min
Suitable material	polyvinylchloride
Evaluation	Information derived from practical experience
Glove thickness	approx 0,8 mm

#### Skin and body protection

Impervious clothing. Wear face-shield and protective suit for abnormal processing problems.

#### **Respiratory protection**

Respirator with AX/PA filter. Full mask with above mentioned filter according to producers using requirements or self-contained breathing apparatus. Equipment should conform to EN 136 or EN 140 and EN 143.

#### **Environmental exposure controls**

If possible use in closed systems. If leakage can not be prevented, the substance needs to be suck off at the emersion point, if possible without danger. Observe the exposure limits, clean exhaust air if needed. If recycling is not practicable, dispose of in compliance with local regulations. Inform the responsible authorities in case of leakage into the atmosphere, or of entry into waterways, soil or drains.

#### Additional advice

Further details on substance data can be found in the registration dossier under the following link: http://echa.europa.eu/information-on-chemicals/registered-substances.

### SECTION 10: Stability and Reactivity

#### 10.1. Reactivity

The reactivity of the product corresponds to the typical reactivity shown by the substance group as described in any text book on organic chemistry.

#### 10.2. Chemical stability

Stable under recommended storage conditions. Stable up to approximately 48 °C.

#### 10.3. Possibility of hazardous reactions

Hazardous reactions occur in the presence of acids, base or oxidizing agents. This reaction is exothermic and may create heat. When finely distributed, self-ignition is possible. May form explosive peroxides.

#### 10.4. Conditions to avoid

Avoid contact with heat, sparks, open flame and static discharge. Avoid any source of ignition.

#### 10.5. Incompatible materials

bases, amines, acids, oxidizing agents.

#### **10.6.** Hazardous decomposition products

No decomposition if stored and applied as directed.

### SECTION 11: Toxicological information

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Likely routes of exposure Ingestion, Inhalation, Eye contact, Skin contact

#### Acute toxicity

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

### Propionaldehyde

10640

#### Version / Revision 2.01

Propionaldehyde (123-38	-6)

### Propionaldehyde, CAS: 123-38-6

### **CMR Classification**

The available data on CMR properties are summarized in the table above. They do not indicate a classification into categories 1A or 1B

#### Evaluation

Did not show mutagenic effects in animal experiments

#### Propionaldehyde, CAS: 123-38-6

#### Main symptoms

shortness of breath, cough, central nervous system depression, hypertensive effect, narcosis, headache, nausea, vomiting, unconsciousness.

#### Target Organ Systemic Toxicant - Single exposure

The available data lead to the classification given in section 2

#### Target Organ Systemic Toxicant - Repeated exposure

Based on available data, the classification criteria are not met for:

#### STOT RE

Aspiration toxicity

### no data available

#### 11.2. Information on other hazards

#### Endocrine disrupting properties

The substance has not been identified as having endocrine disrupting properties in accordance with section 2.3. **Propionaldehyde, CAS: 123-38-6** 

#### Other adverse effects

Components of the product may be absorbed into the body by inhalation and ingestion.

Note

10/15

Handle in accordance with good industrial hygiene and safety practice. Further details on substance data can be found in the registration dossier under the following link:

http://echa.europa.eu/information-on-chemicals/registered-substances.

### **SECTION 12: Ecological information**

#### 12.1. Toxicity

Acute aquatic toxicity			
Propionaldehyde (123-38-6)			
Species	Exposure time	Dose	Method
Daphnia magna (Water flea)	48h	EC50: 88,7 mg/l	84/449/EEC C.2
Pimephales promelas (fathead minnow)	96h	EC50: 14 mg/l	
Desmodesmus subspicatus	72h	EC50: 260 mg/l (Growth rate)	DIN 38412, part 9

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

Product name	Propionaldehyde	
Ship type	3	
Pollution category	Y	
Hazard class	S/P	

### SECTION 15: Regulatory information

# 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### Regulation 1272/2008, Annex VI

Propionaldehyde, CAS: 123-38-6		
Classification	Flam. Liq. 2; H225	
	Eye Irrit. 2; H319	
	STOT SE 3; H335	
	Skin Irrit. 2; H315	
Hazard pictograms	GHS02 Flame	
	GHS07 Exclamation mark	
Signal word	Danger	
Hazard statements	H225, H319, H335, H315	
DI 2012/18/EU (Seveso III)		
Category	Annex I, part 1: P5a - c; depending on conditions	

#### DI 1999/13/EC (VOC Guideline)

Component	Status	
Propionaldehyde	regulated	
CAS: 123-38-6		

#### International Inventories

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

#### Propionaldehyde 10640

Version / Revision 2.01

Propionaldehyde, CAS: 123-38-6

AICS (AU) DSL (CA) IECSC (CN) EC-No. 2046230 (EU) ENCS (2)-486 (JP) ISHL (2)-486 (JP) KECI KE-29254 (KR) INSQ (MX) PICCS (PH) TSCA (US) NZIoC (NZ) TCSI (TW)

### 15.2. Chemical safety assessment

The Chemical Safety Report (CSR) is not required.

### **SECTION 16: Other information**

#### Full text of H-Statements referred to under sections 2 and 3

- H225: Highly flammable liquid and vapour.
- H302: Harmful if swallowed.
- H315: Causes skin irritation.
- H319: Causes serious eye irritation.
- H332: Harmful if inhaled.
- H335: May cause respiratory irritation.

#### Abbreviations

A table of terms and abbreviations can be found under the following link: http://echa.europa.eu/documents/10162/13632/information\_requirements\_r20\_en.pdf

#### **Training advice**

For effective first-aid, special training / education is needed.

#### Sources of key data used to compile the datasheet

Information contained in this safety data sheet is based on OQ owned data and public sources deemed valid or acceptable. The absence of data elements required by OSHA, ANSI or Annex II, Regulation 1907/2006/EC indicates, that no data meeting these requirements is available.

#### Further information for the safety data sheet

Changes against the previous version are marked by \*\*\*. Observe national and local legal requirements. For more information, other material safety data sheets or technical data sheets please consult the OQ homepage (www.chemicals.oq.com).

The annex is not required because the substance is registered as an intermediate under REACh

#### Disclaimer

**For industrial use only.** The information contained herein is accurate to the best of our knowledge. We do not suggest or guarantee that any hazards listed herein are the only ones which exist. OQ Chemicals makes no warranty of any kind, express or implied, concerning the safe use of this material in your process or in combination with other substances. User has the sole responsibility to determine the suitability of the materials for any use and the manner of use contemplated. User must meet all applicable safety and health standards.

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended
