according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

Isononanoic acid M*** 10310A Version / Revision Supersedes Version

2 1.00*** Revision Date Issuing date 19-Apr-2023 19-Apr-2023

SECTION 1: Identification of the substance / mixture and of the company / undertaking

1.1. Product identifier

Identification of the substance/preparation	Isononanoic acid M***		
Chemical Name	3,5,5-Trimethylhexanoic acid***		
CAS-No	3302-10-1***		
EC No.	221-975-0***		
Registration number (REACh)	01-2119517580-45***		

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Intermediate Formulation Lubricants Metal working fluids / rolling oils
Uses advised against	Use in laboratories*** None

1.3. Details of the supplier of the safety data sheet

Company/Undertaking Identification	OQ Chemicals GmbH Rheinpromenade 4A D-40789 Monheim Germany***
Product Information	Product Stewardship FAX: +49 (0)208 693 2053 email: sc.psq@oq.com***

1.4. Emergency telephone number

Emergency telephone number	+44 (0) 1235 239 670 (UK)
	available 24/7***
National emergency telephone	National Poisons Information Centre
number	+353 (0)1 809 2166
	available to the public 8 am - 10 pm
	+353 (0)1 809 2566
	available 24/7 for medical professionals

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

This substance is classified based on Directive 1272/2008/EC and its amendments (CLP Regulation)***

Acute oral toxicity Category 4, H302*** Skin corrosion/irritation Category 2, H315*** Serious eye damage/eye irritation Category 1, H318***

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

Isononanoic acid M***

10310A

2

Additional information

For full text of Hazard- and EU Hazard-statements see SECTION 16.***

2.2. Label elements

Labelling according to Regulation 1272/2008/EC and its amendments (CLP Regulation).***

Hazard pictograms

Signal word	Danger***
Hazard statements	H302: Harmful if swallowed. H315: Causes skin irritation.
	H318: Causes serious eye damage.***
Precautionary statements	P280: Wear protective gloves/protective clothing/eye protection/face protection. P301 + P330: IF SWALLOWED: Rinse mouth P302 + P352: IF ON SKIN: Wash with plenty of soap and water.
	P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310: Immediately call a POISON CENTER/doctor.***

2.3. Other hazards

Vapour/air-mixtures are explosive at intense warming***

PBT and vPvB assessment	This substance is not considered to be persistent, bioaccumulating nor toxic (PBT), nor very persistent nor very bioaccumulating (vPvB)***
Endocrine disrupting assessments	The substance is not listed on the candidate list according to Art. 59(1), REACh. The substance was not assessed as having endocrine disrupting properties according to regulation 2017/2100/EU or 2018/605/EU.

SECTION 3: Composition / information on ingredients

3.1. Substances

Component	CAS-No	REACh-No	1272/2008/EC	Concentration (%)
3,5,5-Trimethylhexanoic	3302-10-1***	01-2119517580-45**	Acute Tox. 4; H302	88,5 - 100
acid***		*	Skin Irrit. 2; H315	
			Eye Dam. 1; H318	
			ATE = 1160***	
			mg/kg (oral)***	

Remarks

Mixture of isomeric Isononanoic acids, mainly 3,5,5-Trimethylhexanoic acid.*** For full text of Hazard- and EU Hazard-statements see SECTION 16.***

SECTION 4: First aid measures

4.1. Description of first aid measures

Inhalation

Keep at rest. Aerate with fresh air. When symptoms persist or in all cases of doubt seek medical advice.***

Skin

Wash off immediately with soap and plenty of water. When symptoms persist or in all cases of doubt seek medical advice.***

Eyes

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.***

Ingestion

Call a physician immediately. Do not induce vomiting without medical advice.***

4.2. Most important symptoms and effects, both acute and delayed

Main symptoms

cough, headache, nausea, shortness of breath.***

Special hazard

Lung irritation, Lung oedema.***

4.3. Indication of any immediate medical attention and special treatment needed

General advice

Remove contaminated, soaked clothing immediately and dispose of safely. First aider needs to protect himself.***

Treat symptomatically. If ingested, flush stomach and compensate acidosis.***

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media

foam, dry chemical, carbon dioxide (CO2), water spray***

Unsuitable Extinguishing Media

Do not use a solid water stream as it may scatter and spread fire.***

5.2. Special hazards arising from the substance or mixture

Under conditions giving incomplete combustion, hazardous gases produced may consist of: carbon monoxide (CO) carbon dioxide (CO2) Combustion gases of organic materials must in principle be graded as inhalation poisons Vapour/air-mixtures are explosive at intense warming Vapours are heavier than air and may spread along floors***

5.3. Advice for firefighters

Special protective equipment for firefighters

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

Isononanoic acid M***

10310A

Version / Revision

on 2

Fire fighter protection should include a self-contained breathing apparatus (NIOSH-approved or EN 133) and full fire-fighting turn out gear.***

Precautions for firefighting

Cool containers / tanks with water spray. Dike and collect water used to fight fire. Keep people away from and upwind of fire.***

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: For personal protective equipment see section 8. Avoid contact with skin and eyes. Avoid breathing vapors or mists. Keep people away from and upwind of spill/leak. Ensure adequate ventilation, especially in confined areas. Keep away from heat and sources of ignition. For emergency responders: Personal protection see section 8.***

6.2. Environmental precautions

Prevent further leakage or spillage. Do not discharge product into the aquatic environment without pretreatment (biological treatment plant).***

6.3. Methods and material for containment and cleaning up

Methods for containment

Stop the flow of material, if possible without risk. Dike spilled material, where this is possible.***

Methods for cleaning up

Soak up with inert absorbent material. Keep in suitable, closed containers for disposal. If liquid has been spilt in large quantities clean up promptly by scoop or vacuum. Dispose of in accordance with local regulations. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours).***

6.4. Reference to other sections

For personal protective equipment see section 8.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Further info may be available in the appropriate Exposure scenarios in the annex to this SDS.***

Advice on safe handling

Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product. Provide sufficient air exchange and/or exhaust in work rooms.***

Hygiene measures

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.***

Advice on the protection of the environment

See Section 8: Environmental exposure controls.***

Incompatible products

bases amines***

according to Regulation (EC) No. 1907/2006 (REACh) Article 31, Annex II as amended

Isononanoic acid M***

10310A

Version / Revision

2

7.2. Conditions for safe storage, including any incompatibilities

Advice on protection against fire and explosion

Keep away from sources of ignition - No smoking. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). In case of fire, emergency cooling with water spray should be available. Ground and bond containers when transferring material. Vapour/air-mixtures are explosive at intense warming.***

Technical measures/Storage conditions

Keep containers tightly closed in a cool, well-ventilated place. Handle and open container with care. Keep at temperatures between 0 and 38 °C (32 and 100 °F).***

Suitable material stainless steel***

Unsuitable material mild steel, copper, brass, including their alloys***

Temperature class T2***

7.3. Specific end use(s)

Intermediate Formulation Lubricants Metal working fluids / rolling oils Use in laboratories*** For specific end use information see the annex of this safety data sheet***

SECTION 8: Exposure controls / personal protection

8.1. Control parameters

Exposure limits European Union

No exposure limits established***

Exposure limits Ireland

No exposure limits established.***

8.2. Exposure controls

Special adaptations (REACh)

Not applicable.***

Appropriate Engineering controls

General or dilution ventilation is frequently insufficient as the sole means of controlling employee exposure. Local ventilation is usually preferred. Explosion-proof equipment (for example fans, switches, and grounded ducts) should be used in mechanical ventilation systems.***

Personal protective equipment

General industrial hygiene practice

Avoid contact with skin, eyes and clothing. Do not breathe vapours or spray mist. Ensure that eyewash stations and safety showers are close to the workstation location.***

Hygiene measures

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.***

Eye protection

Safety glasses with side-shields. In addition to goggles, wear a face shield if there is a reasonable chance for splash to the face.***

Equipment should conform to EN 166***

Hand protection

Wear protective gloves. Recommendations are listed below. Other protective material may be used, depending on the situation, if adequate degradation and permeation data is available. If other chemicals are used in conjunction with this chemical, material selection should be based on protection for all chemicals present.***

Suitable material	nitrile rubber***
Evaluation	according to EN 374: level 6***
Glove thickness	approx 0,55 mm***
Break through time	> 480 min***
Suitable material	polyvinylchloride***
Evaluation	Information derived from practical experience***
Glove thickness	approx 0.8 mm***

Skin and body protection

Impervious clothing. Wear face-shield and protective suit for abnormal processing problems.***

Environmental exposure controls

If possible use in closed systems. If leakage can not be prevented, the substance needs to be suck off at the emersion point, if possible without danger. Observe the exposure limits, clean exhaust air if needed. If recycling is not practicable, dispose of in compliance with local regulations. Inform the responsible authorities in case of leakage into the atmosphere, or of entry into waterways, soil or drains.***

Additional advice

Further details on substance data can be found in the registration dossier under the following link: http://echa.europa.eu/information-on-chemicals/registered-substances. For specific exposure controls see the annex to this safety data sheet.***

General information

A quantitative approach used to conclude safe use for: Environmental compartment Long-term Systemic effects via inhalation Long term local hazards via inhalation Acute local hazards via inhalation Long-term Systemic effects via skin A qualitative approach used to conclude safe use for: Long-term local effects via skin Acute local hazards via skin Local hazards via eyes

Other combinations of operational conditions may also be safe. Please contact OQ in case your local operational conditions differ from the ones described below and you are unsure if they are also safe***

Operational conditions and risk management measures

Following operational conditions and risk management measures, are based on qualitative risk characterisation: Wear suitable gloves tested to EN 374 for activities, where direct contact with substance is possible Clean up spill immediately.

Workers should be warned to avoid skin and eye contact, to wash off any skin contamination immediately and to report skin/eye problems that may develop

Avoid direct eye contact with product, also via contamination on hands.

Containment as appropriate

Minimize number of staff exposed

Ensure segregation of worker from the source.

Good standard of general ventilation

Minimization of manual phases

Avoidance of contact with contaminated tools and objects

Regular cleaning of equipment and work area

Training for staff on good practice

Good standard of personal hygiene

Full skin coverage with appropriate light-weight barrier material

Chemical goggles or safety glasses

Supervision in place to check that the RMMs in place are being used correctly and OCs followed.***
